

CLEANING AND MAINTENANCE SHEET

CLEANING

Ceramica Vilar Albaro tiles are intended for use in indoor premises on wall surfaces.

When the tiles are first taken out of the carton box they may have chalk lines on the surface. These protective lines should only be removed when the tiles are installed and grouted. To remove the chalk lines cleaning should be done with a non abrasive material such as a wet soft sponge or wet kitchen cloth. The tiles should be cleaned with warm water and a standard kitchen detergent similar to Fairy liquid.

When the tiles are in services they should be cleaned using the same method. Wet soft sponge using a standard kitchen detergent similar to Fairy liquid.

It is not advisable to use any products of a rough texture as this may cause scratching to the glazed surface of the tile.

MAINTENANCE

For ordinary cleaning use a damp cloth or soft wet sponge, with or without any ordinary non-abrasive cleaning product.

IMPORTANT : The surface glaze of the tiles are delicate and contact with sharp or abrasive objects risks scratching the glaze.
